[Simulator For Arduino Crack](#)

The screenshot displays the PIC Simulator IDE interface with several windows open:

- PIC Simulator IDE:** Shows the program location, microcontroller (PIC16F876A), and clock frequency (4.0MHz). The last instruction is MOVWF 0x06E and the next is MOVLW 0xCD. The PC register is 09F4 and the W register is 80.
- Special Function Registers (SFRs):** Lists registers like TMR0, PCL, STATUS, FSR, PORTA, PORTB, PORTC, PCLATH, INTCON, PIR1, PIR2, TMR1L, TMR1H, T1CON, TMR2, and T2CON.
- General Purpose Registers (GPRs):** Lists registers from 020h to 02Fh and 030h to 03Fh.
- BASIC Compiler - demo3.bas:** Shows the source code for a sine and cosine wave simulation. The code includes a loop that updates x1 and x2, calculates Sin(x1) and Cos(x2), and outputs the results to the LCD.
- Microcontroller View - PIC16F876A:** Shows the pin configuration for the PIC16F876A, including pins 1 through 14 and their functions.
- Watch Variables:** Shows the current values of variables x1, x2, y1, and y2.
- LCD Module:** Displays the output of the simulation: Sin(2.2000)=0.8084 and Cos(2.2000)=-0.5885.
